

**Amendments to the Claims:**

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (original) A method for altering the appearance of a liquid crystal display comprising:  
providing an electronic device comprising a liquid crystal display comprising a display module and a first front polarizer separated from the display module and removably attached to the electronic device in a position so that a viewer can view the display module through the first front polarizer;  
removing the first front polarizer from the electronic device; and  
attaching a second front polarizer to the electronic device in the position, the second front polarizer yielding a different display appearance relative to the first front polarizer.
2. (original) The method of claim 1, wherein the electronic device further comprises a removable face plate.
3. (original) The method of claim 2, further comprising removing the removable face plate and replacing the removable face plate with another removable face plate.
4. (original) The method of claim 2, wherein the face plate includes the first front polarizer.
5. (original) The method of claim 1, wherein the electronic device comprises a portable electronic device.
6. (original) The method of claim 1, wherein the electronic device comprises a mobile phone.

7. (original) The method of claim 1, wherein the electronic device comprises a handheld computer device.

8. (original) The method of claim 1, wherein the electronic device comprises a personal digital assistant.

9. (original) The method of claim 1, wherein the second front polarizer transmits a different color than the first front polarizer.

10. (original) The method of claim 1, wherein the second front polarizer has a transmission axis that is oriented differently from a transmission axis of the first front polarizer.

11.-12. (cancelled)
